

We're giving it to you in

# black

**Our new disc replacement system gives you a good slice of savings!**

**«Typ R» – the new replacement cutting disk:**

We are offering you a unique replacement system for the new black GSM5 glass-fibre composite discs:

You order a replacement disc for your black GSM5 glass-fibre composite disc.

We'll send you the unique white «Typ R» replacement disc with a new blade.

# and white

It's unique because, for a one-off replacement, we can offer it to you at a sensational replacement price of over 50% less than the black GSM5 disc, depending on the model!

In keeping with the company policy of sustainable and eco-friendly material management, your old disc will be recycled by us. It will then no longer be anti-microbial, but will still have all of its previous material properties and foodstuff-compliance test certificates.

That's how your «Typ R» replacement disc is made – the "white" disc with the «R» for recycling.
